426-26

1894

N° 2432 A.D. 1894

RECORDED

Date of Application, 3rd Feb., 1894
Complete Specification Left, 3rd Nov., 1894—Accepted, 8th Dec., 1894

PROVISIONAL SPECIFICATION.

Improvements in Biscuits.

I, EDWARD FRANCIS COATES, of 28 Market Hill, Sudbury, in the County of Suffolk, Baker and Confectioner, do hereby declare the nature of my said invention to be as follows :—

The object of my invention is to incorporate with the biscuits such chemicals as are prepared for use for medicinal and other similar purposes.

In carrying out my invention, I add the chemical or chemicals during the process of mixing the materials to form the biscuits. For instance; in the manufacture of "tonic" biscuits, I add phosphate or hypophosphite of iron or steel to the flour or meal or other material of which the biscuits are chiefly composed.

By the use of my invention, the nauseous flavour of the chemicals is greatly diminished thus rendering medicines more pleasant to the taste and more readily consumed.

Dated 3rd February 1894.

COMPLETE SPECIFICATION.

Improvements in Biscuits.

I, EDWARD FRANCIS COATES, late of 28 Market Hill, Sudbury, in the County of Suffolk, but now of The London Bakery, High Street, Shanklin, Isle of Wight, Baker and Confectioner, do hereby declare the nature of my said invention and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement :—

The object of my invention is to incorporate with the biscuits certain chemicals prepared for use for medicinal and other similar purposes.

According to my invention I add the chemical or chemicals during the process of mixing the materials to form the biscuits.

The following are the biscuits prepared according to my invention :—

One pound of anæmia biscuits contain :—Phosphate of iron 2 drachms, sugar of milk 14 drachms, flour or meal 6 ounces, butter 3 ounces, egg 2 ounces, sugar 3 ounces.

Babies teething rusks :—Each rusk weighing 6 drachms contain antimonial powder $\frac{1}{8}$ of a grain, nitrate of potash 1 grain, sugar of milk 2 grains, lard 18 grains, yeast $4\frac{1}{2}$ grains, flour is added to make up the 6 drachms.

Army fatigue biscuit :—One pound of these biscuits contain fluid extract of coca 2 drachms, phosphate of iron 1 drachm, sugar of milk 7 drachms, Liebig's extract of beef $\frac{1}{2}$ ounce, batter being added as formed in the anæmia biscuits to make one pound.

Flavouring may be added to suit the taste.

I do not confine myself to the exact proportions above described, as they must be varied to suit the purposes for which the biscuit is intended to be used.

By the use of my invention the nauseous flavour of the chemicals is greatly diminished; thus rendering medicines more agreeable to the taste and more readily consumed.

[*Price* 8*d*.]

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is :—

In the manufacture of biscuits of the description set forth in the Specification ; the incorporation therewith of the chemicals therein specified, substantially as herein before described.

Dated 3rd November 1894.
